LITEMATE

Power Perfected

LED FLOOD LIGHTS

INSTRUCTION MANUAL

Please read the following instructions carefully to ensure that the mounting operation will be carried out correctly.

Dear valued customer,
Thank you for purchasing a Litemate product. Before operating the floodlight, please read the following instructions carefully and keep them in a safe place for future reference.

General Safety Instructions

- Prior to working on any electrical equipment, please remember to switch off the electrical supply (either remove fuse/switch off at the mains).
- Check that there is no voltage present.
- Any installation must be carried out by certified electrician, in a voltage-free condition.
- The light must only be used on flat, stable surfaces.
- Only install with a sufficiently protected 230 V.
- Do not use in rooms that may contain an explosion hazard.
- Do not use in the immediate vicinity of flammable materials.
- Do not use in the immediate vicinity of pools, fountains, ponds or similar bodies of water.
- Do not immerse in water or other liquids.
- Do not operate with wet hands and never look directly into the light source.
- Do not cover.
- Do not operate with open housing or a missing or damaged wiring compartment, and/or lens.
- Do not clean using a pressure cleaner as this can damage the insulation and seals.

Installation

- A licensed electrician should only carry out the installation .
- Before installation, please switch off the electrical supply.
- Connect the pre-wired cable to the electrical supply, observing the correct polarity.

LIVE = BROWN

EARTH = GREEN/YELLOW

NEUTRAL = BLUE

- Ensure the connections and fixings are correct.
- Turn on power and operate the flood light as required.

Setting the flood light direction

Loosen the screws on the sides of the mounting brackets, adjust the flood light direction and tighten all screws.
